

2021

Year of New Beginnings

*Archangel Michael
through Rae Chandran*

Blessings and Love to all, this is Archangel Michael.

In the grandness of the Universe, there are wondrous things to be discovered and the greatest discovery human beings can have at this time is about Self Discovery and when this slowly starts to happen, you will start to discover more and more of the Universe. The year 2021, represents a marker point - a turning point in the history of humanity. Although the planet has shifted a few years back (12.12.12), the coming year is the true beginning of a stronger imprint of this changed energy of 12.12.12.

What we see in the year 2021, is a greater explosion of awakening through out the planet. The year 2021 will be marked as the Great Shift where more and more of humanity will start looking inward and the journey of Self Discovery begins in a greater momentum. We the Spirit realm designate this year (2021) as the year of New Beginnings. What does it all mean?

The planet Earth will be supported by higher beings of light (from other realities) in a more tangible way - (friendly and loving space brothers from outer space). The potential for contact between human beings and higher beings is very high. This contact will not be a one time contact, but a continually growing and evolving one. These contacts will be acknowledged by many of the world leaders and it will bring people together in a more harmonious and united way.

The other development we see in the year 2021, is about understanding and knowingness of higher spiritual truths. Plentiful new revelations will be brought forth through people in a newer and expansive view of the spiritual principles, you have on the planet right now. Some of these will be related to the chakras - (presently, the basic understanding is limited to the 7 chakras) but in the year 2021, a completely new understanding will be brought forth. For eg., all the 7 chakras has all three components to it - the base chakra contains the heart chakra, third eye chakra and crown chakra - in the same way, all the chakras have these three chakras in each of the seven chakras. A greater understanding of the elemental chakras, our own Personal Chakra, the Goddess chakra etc., will be brought forth. New revelations on opening and integrating the higher chakras will be brought forth. The new concept of chakras will slowly shift from 7 to 47th chakra.

This will have a major impact on human consciousness as new thought patterns will start to emerge and these will be imprinted on the earth planet. For the planet to truly change and shift - newer and higher thought imprints are needed. There will also be greater revelations about the primordial life force - Kundalini, that it does not exist only in the base chakra, but through out the body and in all organs and cells. These new understandings will shift the concept of Merkaba into the new and higher forms to Merkana and greater light quotient with in ourselves.

So one of the greatest shift in the year 2021 is the beginning of new spiritual understanding and new thought forms on the planet.

The other potential energy we see in 2021, will be a greater acceptance of Alternative Healing Modalities through out the world. People will seek to understand more about the causes of sickness - not just being physical, but how our emotions and thought patterns affect our health. This will slowly start to reflect in the food consumption and better maintenance of the human body. Herbs and other eastern medicines will become more accepting.

One other potential we see, is about understanding the role of television and media in our daily lives. Humans will start to realize that, television and media are mainly a tool for commercial purposes and has very little truth to the contents they broadcast. A greater scrutiny on the big social media will also be on the spotlight in the year 2021.

There will also be greater call for regulating or look into how the markets are manipulated by a few and how a better system can be implemented. So in many ways, it is a year of taking power back by the people. There will also be greater calls for freedom around the world. Young people will lead this in many countries.

There will also be calls to change the way schooling is done - about the subjects and methods of teaching - More holistic approach to children's education will be emphasized.

We also see the possibilities of discovering new minerals and metals, new species of fishes and other mammals, a greater awareness of the importance of oceans, in the overall balance of the earth.

So we see the year 2021 as a year of true new beginnings in human potential.
