

Death

The death, the great mystery. Humans have always strived to know what is on the other side and how does death occur or why it occurs.

Death is a natural process of evolution. Death does not stop you from your soul growth nor advancement. Death is a doorway, to a new you, and the energy with which you cross over this doorway, determines, what you experience on the other side.

Humans are not much aware of this - they are dying every day when they go to sleep and in fact, every moment passed, is a mini death experience.

Death happens in stages and again, this is not known at a conscious level. There are many levels of consciousness within a being - Conscious level, Subconscious level, Superconscious level and Supra-Conscious level (the combination) of the other three levels. Creations from the Soul happens at this level. So is death, a creation of the Soul?

Yes, the soul chooses to exit the body, for it has finished its agenda with the body - when it knows that, there is no more experiences through which it can grow and experience.

But this choosing may not be aware at a conscious level. Soul is the divine director of your life and for your Soul, what matters is Growth, Experiencing and Being. It seeks these three experiences in all moments.

When one crosses over, at whatever level of awareness they were operating, they will experience a reality at that level. Most human beings have great fear about death and dying. This fear greatly comes from the deep belief systems they have been carrying about Reward and Punishment.

Most believe that, there is judgement and punishment for all the things they have done not out of Love and through punishment, one can redeem oneself. So many seek self-punishment when they cross over.

In truth, there is no judgement nor punishment nor reward for all the good things you have done.

When you cross over, you still carry over your mind and your personality and your feelings and you will again create on the other side from this level unless you become aware of the immense light and help, you all will be provided when you cross over.

If you cross over with a clear mind, then you are able to easily see and perceive the light beings who surround you. Because of the fear of dying, judgement and punishment, the mind and feelings can be clouded and confusion may reign and your creation will come from this confused state.

The power of creation is enhanced when one crosses over and what you think is instantly created and experienced. The next big question is - can one prepare for One's death? Can one know about one's death in advance?

The answer to both is YES.

When one is in touch with the Supra-Consciousness of One's Soul in all moments, one is always prepared and then you know, there is no death, only a new beginning.

How will you live your life, if you were to live like this all moments of your life? Will our words, thoughts and actions be different? Will we operate, more from a place of Love?

The conscious part of you is the part you are aware at a body and feeling level.

Unconscious part of you is the automatic part of you.

Super-Conscious is part of you at a Soul Level

Supra-Conscious is the part of you beyond the Soul Level - God Level.

Human beings operate from all these four levels. These four levels are tied into the area you call the Pineal and depending on the thoughts and beliefs, you activate the consciousness from any one of these four levels.

These four levels are called Kumaras and the Colours for these are -

Soft blue - conscious

Grayish with orange - unconscious

Soft white - Super-Conscious

Gold with turquoise - Supra-Conscious

Connect with the Colours you choose to experience in the Pineal Gland daily and that will be the consciousness you will operate from. It means, you can choose to experience any level of consciousness in life and when you exit the body.

And if you were to exit at a Supra-Conscious level, not only will you be able to choose your next life cycle, you will also offset many of the karmic imprints. When you do not have the fear of death, you will also not have the fear of living.
