

Faith

What is Faith? Faith in whom? Faith in what? Faith in yourself? Faith in the Unseen energy of God? Faith is the foundation energy on which the evolution of humanity is built.

Faith that the intent of the Creator will move us forward into our journey into Oneness and as a species to the desired goal of our intended destiny which is moving us from the dense body of ours into the crystalline based body and ultimately into the Adam body or the Omega Body.

When you have unwavering faith, in the Divine within you, it produces alchemical changes in the chemical structures of your brain and fires up dormant energies in the neurons and it mitigates the effects of the thought patterns coming from the front part of the brain which rules our daily thoughts of survival and instinct.

As you grow in awareness, you must develop the quality of Faith. There are millions of Unseen energies supporting humanity's evolution at this time and preparing humanity for Ascension.

These unseen energies come in many forms - from the gentle whisper of the wind, to the mighty Angels who support humanity, to the gentle inspirations beamed into your higher mind from our Benevolent Space Brothers and Sisters and from the Ascended Masters and your Guides and many more.

Faith is knowing that you are not alone and there is loving support available to you. Faith leads you to have belief and trust in yourself. It also changes the coding in your DNA structures and your genes with new frequencies.

One of the most important energy you can cultivate is the energy of Faith in **GRACE**.

Grace is an aspect of The Creator which is granted to all in which grace can eliminate or erase the deep imprint of certain karmic deeds. It means, through Grace, you will be able to shift karmic energies.

Human beings have long held beliefs that One reaps what one sows. This is true to a certain extent. One need not be reincarnated again and again to balance the karmic energies.

The belief that you need to be born again and again is what draws you more and more into the Wheel of Reincarnation.

Hold the thought and have the belief that through the power of Grace, one can transcend this wheel and move into Oneness Consciousness.

Grace energy is tied into your Heart energy and the more your heart is opened, the more grace you have in your life.

It is the Grace energy which has stopped humanity's extinction several times and this energy is available to all through the love of God and through one's fully opened heart. Grace energy when fully awakened, has the capacity to shift the frequencies of the cells and to open the energies of the sacred divinity of the Trinity which are shaped like Bells.

There are three Bells in the human energy system. One Bell extending from the Soul Star Chakra (8 inches above the head) to the Sternum area. The second bell from the Solar Plexus to the knee area and the third Bell beneath the knee extending up to the Earth star chakra (8 inches underneath the feet).

Trinity energy contains the essence of Full Resurrection without carrying the baggage from the past. Consider living with this Trinity energy in all moments of life. Seek this energy and you shall find it. It will fulfill you to the highest.
