

Heart Space

There are electrical currents in the heart which are birthed from the source code existing within the hidden chambers of the heart. These electrical currents are related to the opening of the valves in the heart which feeds the endocrine systems, the gall bladder and the spleens.

Your heart chamber is vast and contains a maze of deep tunnels and caves and each of the tunnels and caves contain deep secrets about yourselves.

Human beings have always asked - Who am I, Where am I from, Where am I going? The answer to all these is in the secret caves of your heart. Your heart energy is connected to the Mother Earth's heart and also to the divine heart of Divine Mother - Amma.

Everything created has a heart center. Flowers, plants, trees, animals, birds etc. all has a heart center. The minerals and crystal kingdom also have their heart centers.

What does it mean to all of you? The heart center contains the core energy of you - the very essence of you. Every music produced, every painting created, every dance danced has a core energy.

This core energy is the life force - the God Force which exists in all moments of creation.

The next time, you observe anything - a musical note, a sunset, a gentle breeze, a finely baked cake, a glass of wine etc., try to feel the essence of it.

Try to feel it with your fullness of being. When you are able to feel it with your full being, then you can simply recall that feeling within you, any time you choose to experience it and it will feel like exactly the same as you experienced it the first time.

You have come here to Earth to experience the fullness of your being through the full essence of all and this is achieved through your heart space. Practice being in the heart space and observe and feel everything from the heart space.

Your experience will be richer, and it will be etched in the memory of your heart.

Your heart space has the capacity to connect and communicate over vast distances of time and space. You can connect through your heart space, with beings from other planets and with all of nature.

When you live from your heart, you are living from your center.

Have you read a book which is written or translated, which was written when the author or translator were in their heart space and felt the depth and vibrations and feelings of each word and sentence? The same goes for speaking. Coming from the heart uplifts and empowers you.

Observe your words and actions. From which part of you is it coming? Practice the art of all your experiences originating from your heart center.

Since your heart is connected to the Universal Heart, then most of your actions will be of benevolent nature. Your heart space is vast and multidimensional. It has colour to it and it carries the original energies of the wisdom keepers who seeded the planet.

Connect through your heart space the essence of Butterfly, Whales, Alpaca, Cats, Bees and Deer.

These beings brought with them the essences of their home planet and have anchored this on to the earth plane. The main essence they carry are Love and Freedom.

Your heart space is a carrier of these two essences - Love and Freedom. When you are fully in your heart space - you are living in Love and Freedom.

Heart Space equals - Living in
Naturalness

Heart space equates - Living in
Harmony and Balance

Heart space means Living in
Gentleness and Kindness

Heart space is - Living in One's Soul
Frequency

Heart Space is - Living in Oneness
and Unity

Heart space is - Living in
Appreciation and Gratitude

Heart space is - Living in your
Buddha Nature

Come back to your heart space, the
place of Solace and Comfort.

Simply bringing your right palm and
placing it on your heart and feeling
the heartbeat and being with it, will
create awareness of your heart space
within you.
