

## *Human Thought - Magnetic Force*

*Human thoughts are magnetic forces. Humans are born on the earth plane to understand the power of their thoughts and its ability to manifest it in matter. You all have heard the expression - thoughts are the base energy of creation. We have come here to master the energy of thoughts. Since thoughts are magnetic, they have electric current running in them. Can you imagine the awesome power which exists as a collective group of all people, their energy of thoughts. When a critical mass of people are able to hold a thought for some time, it can manifest as an outer reality very quickly.*

Are humans using this awesome power of creation? It is time for humanity to understand the appropriateness of thoughts.

Whose thoughts are coming into them? Theirs? Or from the matrix, or from the lineage of your ancestors, or from your culture and so on.

Most of the thoughts asking about how, what, why, where and when are coming from the instinct part of you which are tied into your lower chakras. For the instinct wants to know - how to survive and these questions are important for it to feel secure.

The higher nature of you which are connected to your higher chakras has its thoughts based on Universal principles and allowance, seeing the larger truth and choosing to allow it to happen or being in the flow of things. So observation of your thoughts is the first step towards balance.

Your thoughts has the capacity to pierce through thick matter and since it is electrical in nature, it gets connected to the Solar energy which are also electric in nature.

Now Solar energy affects the endocrine systems in the body and it helps in the production of certain minerals and chemical compositions for the well being of the body.

*So if you have thoughts coming from the lower chakras, the electrical forces the thought carries are weak in nature and even if it gets combined with the Solar force, which produces chemicals and minerals for the well being of the body, it is of a weaker nature since the energy of the thoughts you put in also is weaker. Practice holding high energy thoughts by continuously bringing higher vibrational words in your mind and through the principles of quantum mechanics, one high power thought has the capacity to penetrate the thick density and one can join with the collective energy of all - which you call God Force.*
