

Hello, My Dear Sisters and Brothers,
this is Isis.

Many of you know me as the Mother of Love, Mother of Mystery and Alchemy, Mother of Wholeness. I am all these and more. I hold the frequency of Love for the earth and its inhabitants for the forward moment of human race and earth. This is just one small aspect of my wholeness.

I, along with my beloved Osiris have been holding the light for earth for eons of time. My beloved Osiris holds the energy of Renewal and New Beginnings - which can also be called as Rebirth or Resurrection in all new moments.

Have you ever wondered; how does the human consciousness evolve - how do they progress - what made them think a higher thought to create a new reality? If there were no higher thoughts, then there is no growth or advancement. Osiris and I have been the energy behind each inspiration to change, to discover, more of yourself and create a better life.

The energy of Osiris is an embedded energy inside the pineal gland and when fully awakened, it can spur growth in all areas of life. What prevents human beings in discovering more of themselves? It is Fear?

Fear of the unknown. Fear of the unknown creates the fear of failure. Fear of failure triggers the energy of doubt, confusion and survival and the lower energies embedded in the chakras gets activated and this pulls back human endeavor.

Also, due to the experiences of pain and suffering one has endured in the past, there is a great fear of any pain which may be caused if you were to try a new experience.

Osiris' energy gently helps you to move beyond this encoded energy of pain and suffering and helps one to move into a place of new beginnings. Fear stops human beings from growth. In all the mystical teachings around the world, much emphasis has been placed on this.

What do human beings fear the most - Death? The fear of death causes the fear of true living in one's natural state of Love and Joy. When you release the fear of death, you will release the fear of living.

Are you willing to let go of the fear of the Unknown? Or are you only staying in one of the early chapters of your book of Life? There are many chapters of your Book of Life.

In Most cases, there are between 36 and 44 chapters for each person - some more, but mostly in this range. Osiris energy propels you to move forward by ending and beginning a new chapter of your life.

His energy is part of the Dragon energy and the Phoenix energy. Both these energies represent the dissolution and new creation. From the ashes, one rises again. Go into your pineal gland and open the Osiris code. This code is shaped like a bow and arrow.

The color associated with are - silver and gold. Bring your thumb and touch the pineal gland chant the word

OSI, OSA, OSIRIS

for a few minutes and then visualize the arrow being released and it will travel through the earth's atmosphere and join with the Galactic Code and the Solar Code, where your Oversoul and Spirit Self resides.

When you do this, you may feel a disconnection and fear can come up, as your present life is built on all the thoughts and beliefs you have about yourself, and now you are moving into the unknown.

This is where your faith about yourself comes up - can you trust your self - your Soul Self to carry you forward.

The journey into the unknown, will take you to the temple of Osiris and depending on how much courage and faith you have in yourself; you will be initiated into the Order of the One.

Are you ready for this magnificence? Are you ready to accept your Larger Self?

In the month of December when the holy energy of new birth is on the earth plane, there will be greater downloads of pure crystalline frequencies coming from the Universal realm of Lord Melchizedek.

When there is no fear, then you will be in a better position to be able to feel this energy as then the organs of your body are more open and receptive.

We await your return to your Oneness.

Isis and Osiris
