

*In the vastness of the magnificent sky,  
A Star, burst forth bringing forth its vast array of Colours and magic  
Out it went into the Earth and its life forms, for nourishment and support  
This it rejoiced for it was fulfilling its Dharma, and with this newfound light in all life forms,  
The magic of creation in all life forms began for it was the nectar of life  
And this sweet elixir was the atoms on which creations could be built  
Out came the Sun and Moon and blessed all with their love and light  
And out came the blessings of Divine Mother, anchoring the precious liquid of LOVE  
For it was the glue which bound the creations together  
Out came creations through Song, Music, Dance and all else and in this Holy Creation,  
The Heavens danced, for life on earth was celebrating God in all its forms  
The wonder and beauty of the creations was magic to behold  
Others from the Universe gazed in wonder and clapped their hands in joy and celebration  
For Humans were in the act of becoming God/Goddess  
And perpetuating the infinite expansion of God and the Universe.*

*Dedicated to All my Soul Brothers and Sisters*
